HVAC Project Manager

Description

Downtown Mechanical – Union Contractor

Downtown Mechanical is seeking an experienced **HVAC Project Manager** with strong knowledge of **residential and light commercial systems**.

We are especially interested in speaking with a **retired or near-retired member of Local 19** who wants to stay active in the trade while stepping into a leadership role.

What We're Looking For:

- Extensive background in residential and minor commercial HVAC
- Strong understanding of union work practices and jobsite coordination
- Experience managing installs, retrofits, change-outs, and small commercial projects
- Ability to read plans, prepare material takeoffs, and coordinate crews
- Excellent communication with customers, field crews, and office staff
- Commitment to quality workmanship and safety

Responsibilities

- Oversee residential and light commercial HVAC projects from start to finish
- Coordinate manpower, materials, and scheduling
- Ensure projects stay on budget and on schedule
- Serve as liaison between field technicians and management
- Maintain union standards and jobsite professionalism

Why Join Downtown Mechanical?

- Established Union HVAC contractor
- Strong reputation for quality and integrity
- Supportive team environment
- Flexible opportunity ideal for an experienced tradesperson looking to transition off the tools

If you're a seasoned professional who knows the trade inside and out and wants to bring your experience to a respected union shop, we'd love to talk.
